

# COLLABORATE / INSPIRE / ENHANCE CONNECT: IMSITE FORUM

## Dissemination forum invitation

You are invited to attend a dissemination forum for the Inspiring Mathematics and Science in Teacher Education (IMSITE) project. The IMSITE project is funded under the "Enhancing the Training of Mathematics and Science Teachers" program, to recruit, better train and retain mathematics and science teachers.

IMSITE is a collaborative project across faculties: brokering the boundaries and enhancing pedagogical content knowledge.

## Project aims

The IMSITE project's major aims are:

- To foster genuine, lasting collaboration between the mathematicians, scientists, and mathematics/science teacher educators who prepare future teachers of secondary school mathematics and science, with an emphasis on the middle-school years.
- To identify and institutionalize new ways of integrating the content expertise of mathematicians and scientists, and the pedagogical expertise of mathematics and science teacher educators.

With these aims in mind, this forum intends to discuss a draft model of sharing and collaboration, which is currently taking place between the School of Mathematics & Applied Statistics and the School of Education.

## Details

When: Friday, 3<sup>rd</sup> October, 2014

Time: 12.30-1.30pm

Where: 67.208

A light lunch will be provided.

Please RSVP to Sue Denny  
(sdenny@uow.edu.au) before 29 September.
